⚠ DANGER

All pilot lights, appliances and their igniters (see operating instructions) shall be turned off before refueling of motor fuel tanks and/or propane containers.

Can cause ignition of flammable vapors, which can lead to a fire or explosion and result in death or serious injury.

⚠ DANGER

All pilot lights, appliances and their igniters (see operating instructions) shall be turned off before refueling of motor fuel tanks and/or propane containers.

Can cause ignition of flammable vapors, which can lead to a fire or explosion and result in death or serious injury.

⚠ WARNING

Do not fill propane containers to more than 80 percent of capacity. A properly filled container contains approximately the propane container's design pressure. Overfilling propane gas, which could lead to a fire or explosion and result in death or serious injury.

⚠ WARNING

This propane filling system is designed for use with propane only. An air leak will reduce the air pressure. See the instructions for the propane gas cylinder for proper use. After refueling, the propane gas cylinder must be closed and the propane gas cylinder must be secured in the compartment. Do not use the propane gas cylinder for any other purpose. Do not use the propane gas cylinder for any other purpose. Do not use the propane gas cylinder for any other purpose.
